

THE SCIENTIFIC REPORTS OF THE KYOTO PREFECTURAL UNIVERSITY AGRICULTURE NO. 25

Contents

Agriculture

- Physiological studies on the growth and development of peach fruits I
Anatomical changes during the development of peach fruits
.....M. ISHIDA, A. INABA and Y. SOBAJIMA.....1
- Studies on production of vegetable crops in water culture IV
Effect of nutrient concentration on growth and yield of tomatoes
.....S. TAKASHIMA, T. NAMIKI, S. FUKUI,
T. TAKEUCHI and S. NISHI.....9
- Studies on production of vegetable crops in water culture V
Effect of O₂ concentration in nutrient solution on growth and yield
of tomatoes
.....T. NAMIKI, S. NISHI, A. HANEDA and S. TAKASHIMA.....17
- Polyuretane-tube method for protection of *Phytophthora* disease
of *Cucurbitaceae* plants
.....Y. MIYATA, H. MASAGO and M. NAKAJIMA.....25
- A new aspect of protection method for *Phytophthora* and *Pythium*
disease by nonionic surfactants II
Reinforcement effects by some fungicides.....Y. MIYATA, T. NAMIKI
S. TAKASHIMA and H. MASAGO.....30

Forestry

- Studies on mud-flow IV
On velocity and impact force of mud-flow
.....H. HIURA, K. OHTE and S. HEKI.....37

Agricultural Chemistry

- Application of decoration method to observation of growth pattern on
kaolinite crystals.....K. YONEBAYASHI and T. HATTORI.....49
- Neutral diol lipids in plant seeds.....M. NODA and Y. UMEDA.....53
